_____

Experience

Valorant Digital
Freelance Software Developer
2021 - Present (2 years)
Building out the IT to help Small Businesses across the Globe grow their
practices.

--

* Web Development & Mobile Development to the delight of our wonderful
clients.

* Rapid Development of Java Spring APIs to serve content to user devices.

* Managed AWS & GCP Environments to host internal and client
environments.

--

Technology Used: React Native / WordPress / PHP / HTML5 / Docker / Java
Spring API / GCP

Booz Allen Hamilton
Okta IAM Integration Engineer
2019 - 2020 (1 year)

Doing developer things integrating Managed Identity SaaS with Enterprise web and mobile applications. Answering the CISO question of "Will it okta?"

--

* Led rapid prototyping efforts in support of Enterprise Single Sign On capability.

* Developed SSO solutions integrating Okta SaaS with Web, Mobile & CMS Systems.

* Integrated on-premise Active Directory instances with Okta to enable a delegated user authentication model.

--

Technology Used: Okta / React Native / React / HTML5 / JavaScript / Android Java / iOS Swift

Sapient
DevOps / Build and Release Engineer
2017 - 2018 (1 year)
In how many ways can I move a piece of code from one place to another?

--

* Responsible for automated builds and releases of applications from source code control to Production environments.

* Configure and maintain automated build jobs in Jenkins integrating Gitlab, Nexus, Oracle databases and application servers.

* Manage and maintain all non-Production Red Hat Linux and Windows servers supporting multiple projects.

--

Technology Used: Docker / Jenkins / GitLab / Nexus / Bamboo / Bash / Red Hat

Carr Astronautics Corporation
Full-stack Developer
2015 - 2016 (1 year)

Visualizing multi-band weather satellite data on open source globe software.
#cool.

--

* Created RESTful service back-end to serve temporal image content from
various satellite sources to multiple UI client applications.

* Architected Java service layer for creating and registering services for data
loading, processing and automated management.

* Built distributed data acquisition pipeline to fetch, process, and persist
satellite images from external locations to local storage.

--

Technology Used: CesiumJS / Java Spring / JavaScript / jQuery / JSP /
Maven / Glassfish

Accenture
Software Engineering Consultant
2014 - 2015 (1 year)

All Big Data, All Day. Integrating search, streaming data and centralized
identity in a Big Data Environment.

--

* Wrote Java MapReduce applications to batch load and process structured
data into Cloudera Hadoop stack.

* Created ETL processes to transform and load data into multi-tenant
Elasticsearch data nodes for end-user analysis.

* Responsible for installation, maintenance and integration of Elasticsearch
components into greater Hadoop architecture.

--

Technology Used: ElasticSearch / Kibana / LogStash / Red Hat / Elastic Security / Cloudera Hadoop / Impala / Bash

Avnet
IBM WebSphere Commerce Consultant
2013 - 2014 (1 year)

Ecommerce Developer In a land before time, when few ecommerce stores had rich media carousels and rotating product imagery.

--

* Designed, developed and tested digital rich media user interface widgets using WebSphere Commerce Composer framework.

* Developed ETL scripts for migrating and mapping client digital media collections to Commerce store catalog entries.

* Provided technical sales support for pre-sales demonstration and information sessions to potential new clients.

--

Technology Used: IBM Websphere Commerce / IBM DB2 / IBM WorkLight / Java SOAP / JSP

Hewlett Packard Enterprise
IT Software Developer/Engineer II
2009 - 2013 (4 years)

Enterprise Software Developer doing all the developer things it takes to put consumer products on the shelves.

--

* Engineered software solutions for onboarding mission critical company assets onto enterprise records management system.

* Developed ETL applications using Java, C# and SQL to load, massage and transfer data to external content retention system.

* Informatica Business Objects Universe development so that End Users could do extended reporting

--

Technology Used: Java / C# / Visual Basic / Oracle DB / Informatica Developer / Microsoft SSIS / Microsoft SSRS / HP-UX / Red Hat
